

TRANSPORTATION TECHNOLOGIST / ANALYST

About Us

Our strength is our people. Bunt & Associates has been the transportation consultant of choice for hundreds of repeat public and private sector clients for more than 25 years. Our reputation is the result of our values: doing the right things for the right reasons – and doing them well – while providing fulfilling careers for our employees, working as a team, and delivering exceptional service and successful projects for our clients.

We are a group of highly motivated and professional individuals who work to maintain excellence in client experience and exceptional product delivery. Bunt offers a positive work environment that recognizes the importance of professional development, opportunities for advancement, and a work-life balance. This is our commitment in support of attracting and keeping exceptional people.

Job Description

We are seeking a Transportation Technologist / Analyst to complement and augment our Calgary team. This position would interest someone looking to work in a boutique style organization with offices in Calgary, Edmonton, Kelowna, Vancouver, and Victoria.

There will be opportunities for roles and responsibilities to grow and evolve as skills and experience develop. The successful candidate will provide support to professional staff in carrying out traffic engineering and transportation studies. The position requires the following skill sets:

Required Technical Skills:

- Transportation data collection programs
- Transportation infrastructure conceptual / functional design using AutoCAD
- Vehicle swept path analysis using AutoTurn
- Trip and parking generation forecasting
- Traffic signage, pavement marking and traffic control plans
- Traffic operations analysis using industry-standard software

Communication and Time Management Skills:

- Preparing high quality text, tables and graphics summarizing analysis results for inclusion with technical reports
- Effectively communicating your ideas and findings to other Bunt staff and Project Managers in writing and verbally
- Ability to identify and set priorities and effectively manage time
- Strong attention to detail and quality

Desirable Skills:

- Knowledge of municipal and provincial planning processes and plan hierarchies
- Knowledge of local, county, and provincial transportation infrastructure design and drawing standards
- Knowledge of capacity analysis
- Training or understanding of in ArcGIS
- Training or understanding of in CorelDraw

Qualifications & Experience

Applicants should have a diploma in a Civil Engineering technology program and be registered or will be eligible to register with provincial association. We are seeking candidates with up to two years of direct relevant experience, preferably in the consulting industry or will consider new graduates with relevant co-op experience.

We are seeking an individual who has:

- the ability to work well as part of a team or on an individual basis
- the ability to communicate effectively in both oral and written forms
- the aptitude to learn additional computer skills
- the ability to identify and set priorities and effectively manage time
- the required attention to detail
- a valid Class 5 Drivers License and access to a vehicle

Compensation

We offer competitive salaries, a performance bonus incentive program, and an excellent benefits package. Salary would be commensurate with experience level, qualifications, and skills of the applicant.

How to Apply

If you are ready to take on an integral role in ensuring the development of positive transportation solutions, feel you possess the necessary skills, and are interested in working in a dynamic and positive environment with a highly skilled and fun loving team, please email your resume, references, and cover letter to careers@bunteng.com.

We thank all interested candidates; however only those short-listed for an interview will receive a response.
